

## Lot Line Adjustments

---

A property line adjustment procedure is used to relocate a single existing common property line between two abutting properties. No additional lots or building sites may be created. Property line adjustments can only be submitted on lots of record. A partition is required to create an additional lot.

### Application Requirements:

1. Submit complete lot line adjustment application form including signatures of property owner(s).
  2. Submit map or drawing to scale showing lot line changes, all existing structures, and any on-site sewage disposal systems.
  3. Submit filing fee.
  4. Include water rights map if the property(ies) contain(s) water rights.
