Subject: Tumalo - People's Voice

Reply-To: Robert Fish <fishintumalo@yahoo.com>

Gentlemen, I am sending this note to express my concerns in regards to the development of the Tumalo community. The basis of American Freedom is that a person should have the ability to affect their destiny through communication and involvement; within their local, regional, and national levels of Government. With that being said, I see no reason to restrict the formation of an organization to allow the residents of the concentrated Laidlaw (Tumalo) area to do just that. The intent of the group would be to allow those, not included in the Tumalo Business group, to have a method of sharing their opinions, thoughts, and desires with the Government agencies that will be making decisions that affect ALL of those residing in the narrowly defined area of Tumalo. We should be considered as voice for another important contingency of the local community.

Thank you for your time.

Robert Fish
