DATE: December 5, 2013
TO: Deschutes County Planning Commission
FROM: Matthew Martin, Associate Planner
MEETING: December 12, 2013
RE: Non-Resource Lands Program / Second Panel

I. Background

The County is undertaking a long-term project exploring the creation of a non-resource comprehensive plan designation and zone. Non-Resource Lands do not meet the definition of agricultural lands found in Statewide Planning Goal 3 (Agriculture) and accompanying administrative rules (OAR) due to the presence of poor soil conditions, lack of irrigation, climate conditions, and other relevant factors, including but not limited to past use. They differ from Rural Residential Exception Areas and other rural areas not planned and zoned for farm activities. Instead, they are characterized by large tracts without an existing settlement pattern and supporting residential infrastructure. Because Non-Resource Lands are not physically developed or irrevocably committed to other uses, they do not qualify for an exception pursuant to OAR 660, Division 4. It is recognized that there are properties in the county that are currently zoned agriculture but do not meet the definition.

The Non-Resource Land Program kicked-off at the November 14, 2013 Planning Commission meeting with introductory presentations from the Department of Land Conservation and Development (DLCD), Oregon Department of Agriculture, and Deschutes County. The purpose was to discuss the history of agricultural land use regulation in Oregon and Deschutes County. Given the panel's expertise and subject matter, the meeting was also recorded by video. It will be posted on the County's website by the end of the month.

At the conclusion of the meeting, the Planning Commission requested staff obtain agricultural economic data for Deschutes County. Attached are the following:

- *2007 Census of Agriculture (USDA)*
- *Oregon Agriculture: Facts and Figures (ODA)*
- *Selected Economic Characteristics in Central Oregon (US Census)*

II. Second Panel

The December 12 meeting will provide a continuation of this discussion but now from a local agricultural industry perspective. A panel consisting of regional agricultural experts will be convened with representatives from Central Oregon Irrigation District, Deschutes Soil and Water Conservation District, DLCD, and agricultural producers. The purpose is to identify characteristics that support or present barriers to productive agriculture operations in Deschutes County. In addition, the panel will discuss the potential impacts (positive/negative/neutral) of establishing a non-resource lands designation and zone option. This discussion will provide valuable information that will assist in drafting a conceptual framework of the non-resource lands program that is reflective of both State standards and local conditions.

III. Public Engagement

Looking into the New Year, planning staff will develop a framework of the non-resource lands criteria, process and standards based on several scenarios that can eventually be shared with the public and stakeholder groups in Winter 2014. Scenarios will draw from information provided during the previous panel discussion, existing non-resource land programs in Crook and Jackson counties, the Southern Oregon Pilot Project for Regional Farm and Forest Land Conservation and several recent hearings officer decisions. This framework will be presented to the Planning Commission in January for review. Upon receiving Planning Commission support, staff will organize a comprehensive public outreach campaign to solicit feedback on the work to date.
