

Child and Adolescent Health

Regional Health Assessment Midpoint Update 2017

Breastfeeding

Percent of babies breastfed, Oregon birth certificates, 2013-2015

The percent of all babies who were breastfed at birth decreased in all three Central Oregon counties. The percent of babies who were breastfed at birth by WIC-enrolled mothers, however, increased in Crook and Jefferson Counties, and remained the same in Deschutes County.

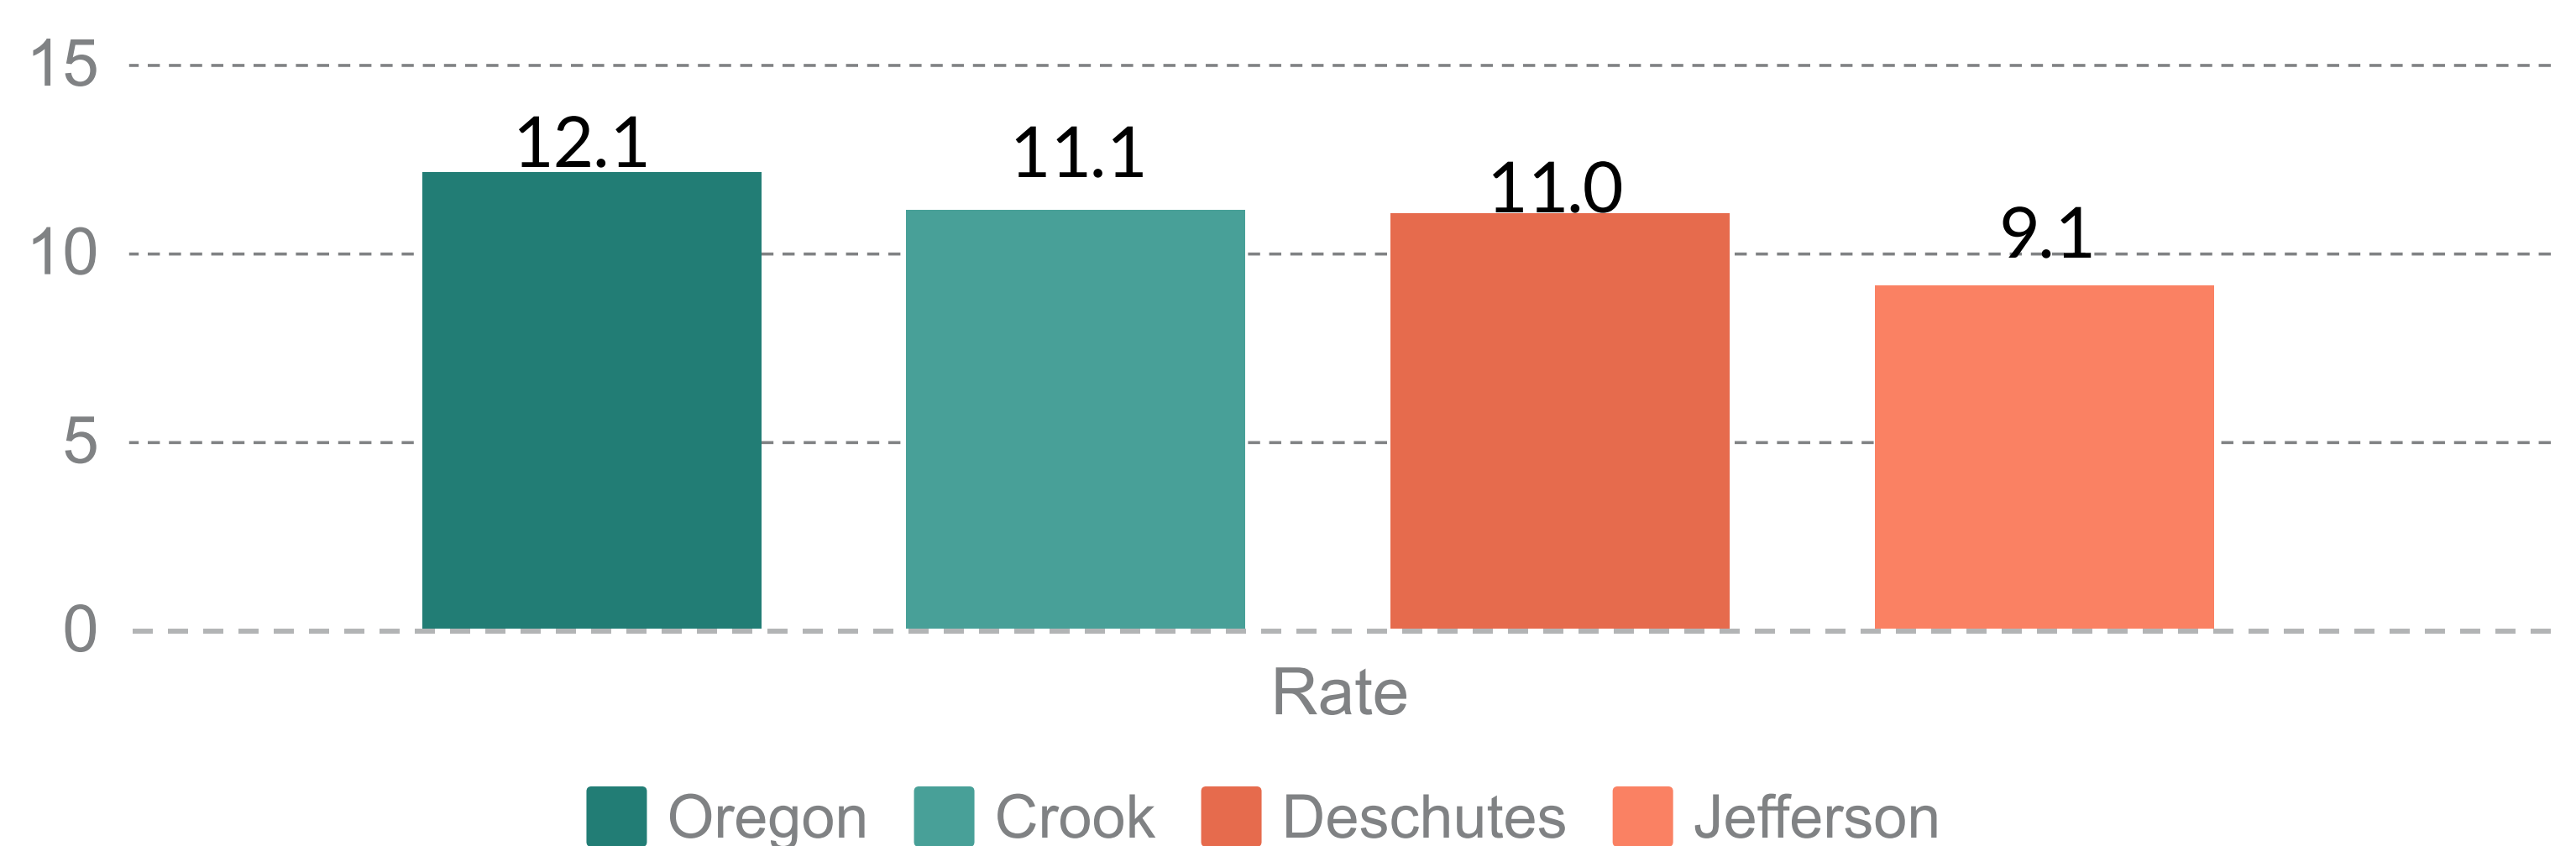

Abuse

The rate of child victims of abuse or neglect decreased in Crook County, and increased slightly in Deschutes County.

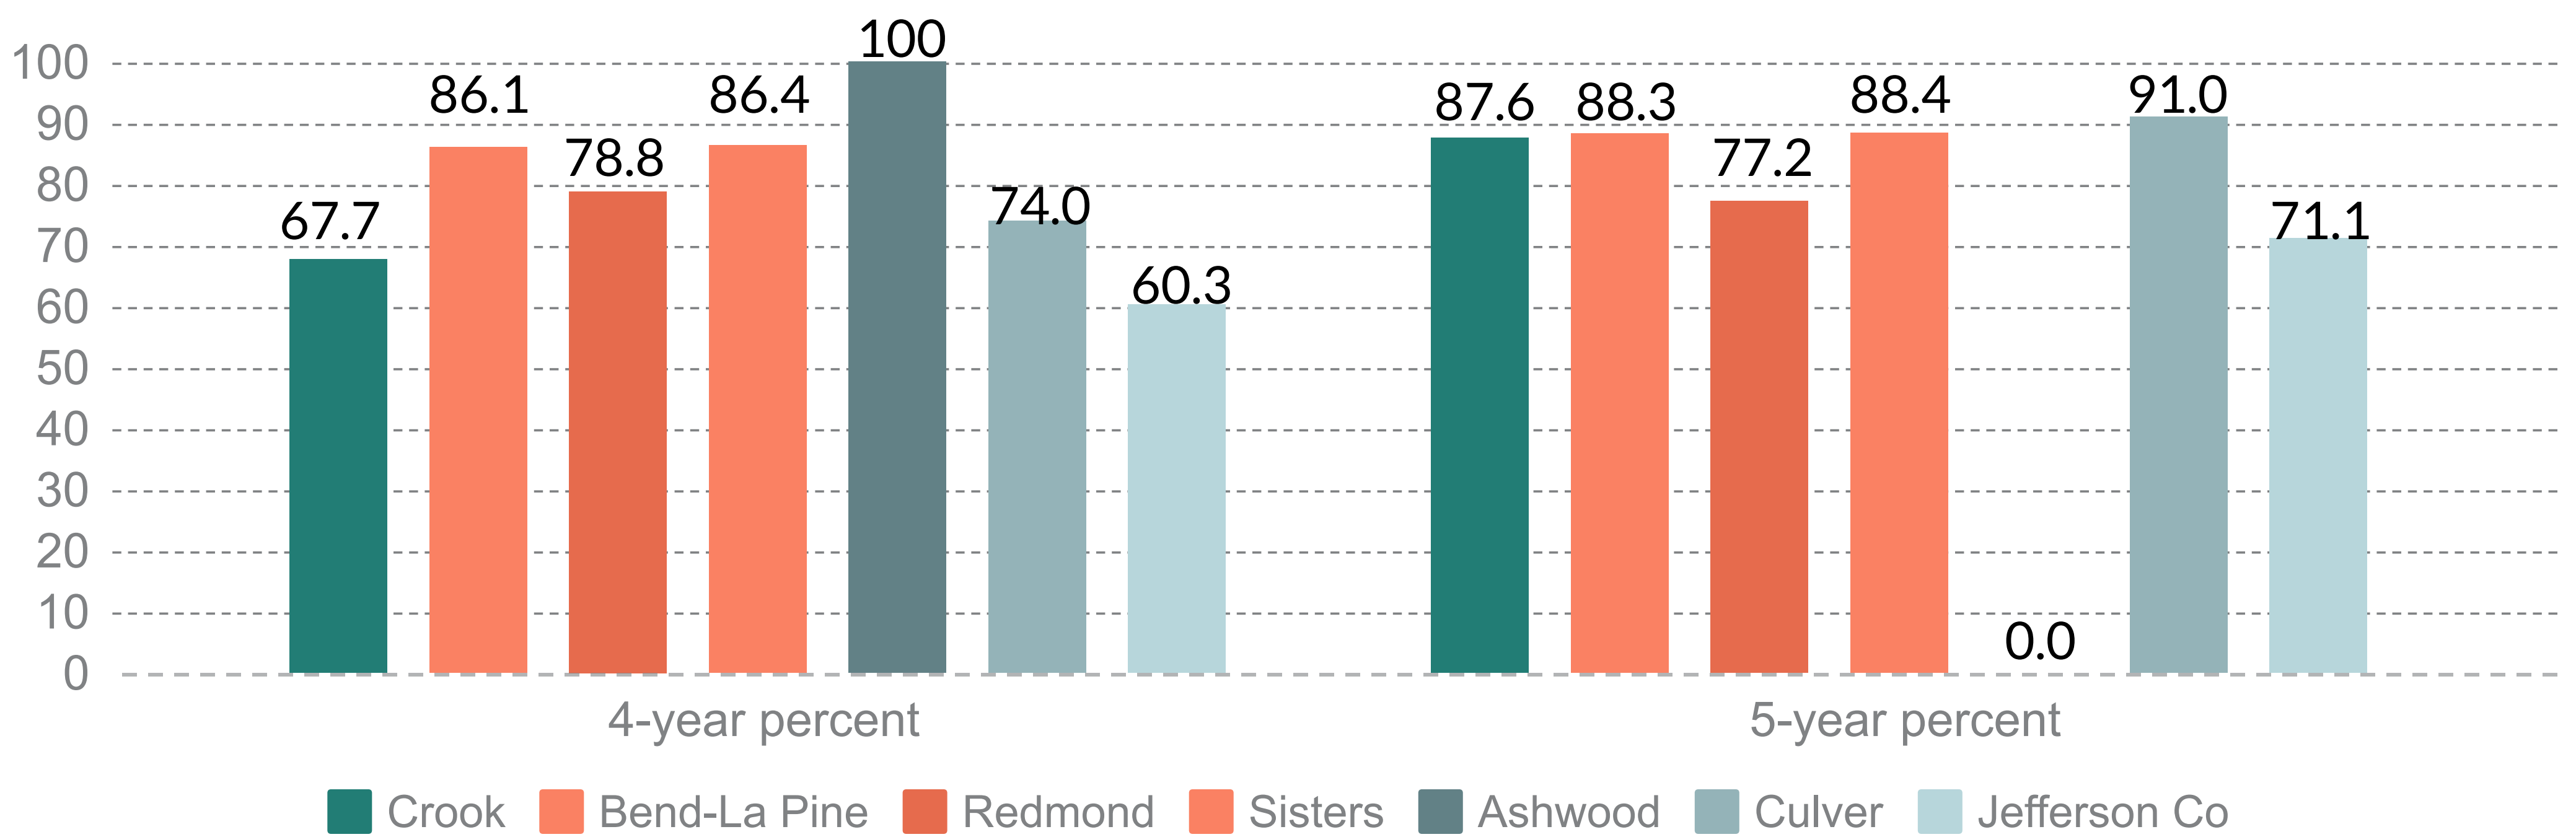

Rate of child victims of abuse or neglect per 1,000 children under age 18, Children First for Oregon report

Graduation Rates

Percent of students who graduated high school in four and five years, by school district, ODE, 2015-2016.

The four- and five-year high school graduation rates improved in Crook County and in the Bend-La Pine and Redmond school districts.

Risk behaviors

- The percent of 11th graders who reported ever having sexual intercourse decreased in all three Central Oregon counties.
- The percent of 11th graders who drove a vehicle at least once after drinking alcohol in the past 30 days increased in all three Central Oregon counties.
- The percent of 8th and 11th graders who reported drinking alcohol in the past 30 days decreased in Crook and Deschutes Counties, but increased in Jefferson County.
- Marijuana use among 11th graders increased in Crook and Deschutes County, but decreased in Jefferson County.
- The percent of 11th grade students who reported smoking in the past month decreased in all three Central Oregon counties.
