

# Access to Care

## Regional Health Assessment Midpoint Update 2017

### Percent of population aged <65 uninsured

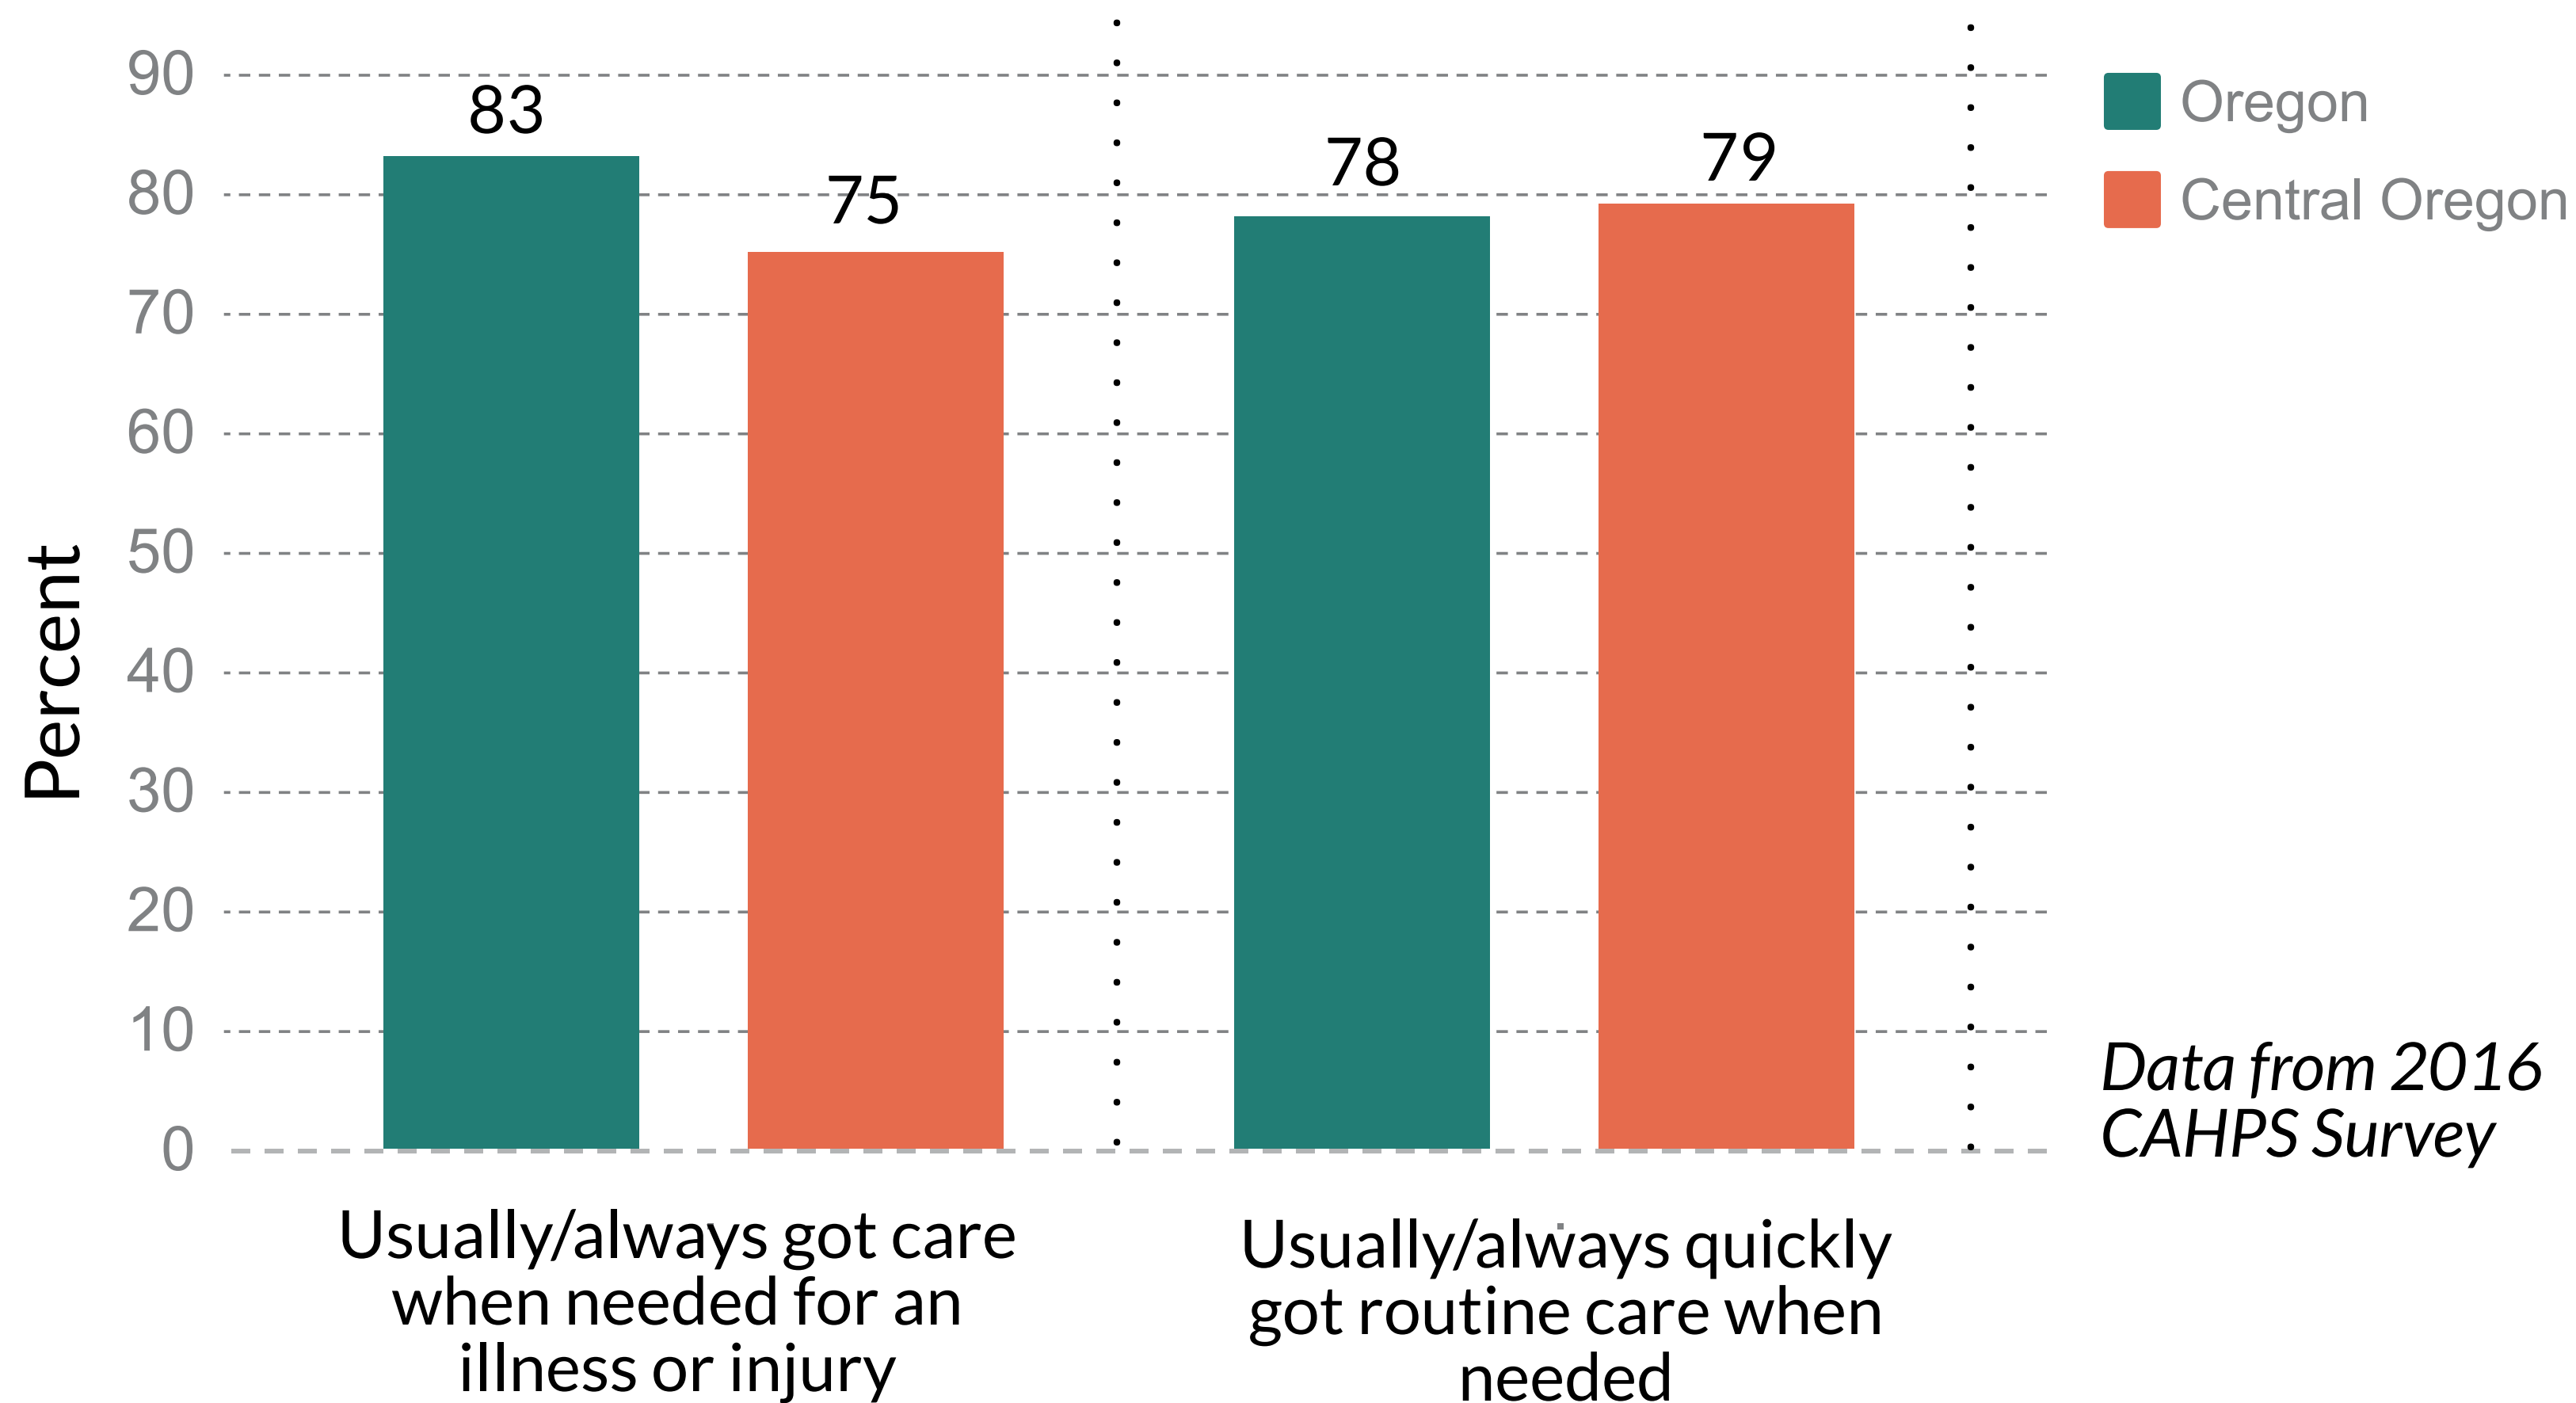

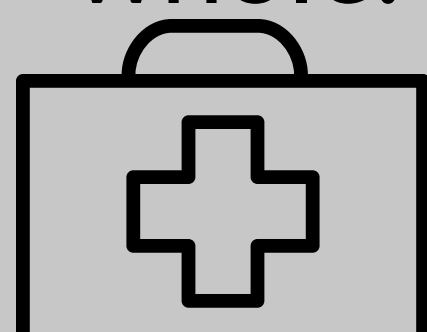

The percent of the population under the age of 65 who were uninsured was larger in Central Oregon counties than in Oregon.

Data from 2015 American Community Survey

### Quality of Care for Central Oregon OHP Members

A lower percentage of Central Oregon OHP members reported usually/always getting care when needed for an illness or injury than Oregon OHP members as a whole.

Data from 2016 CAHPS Survey

## Unmet Healthcare Need

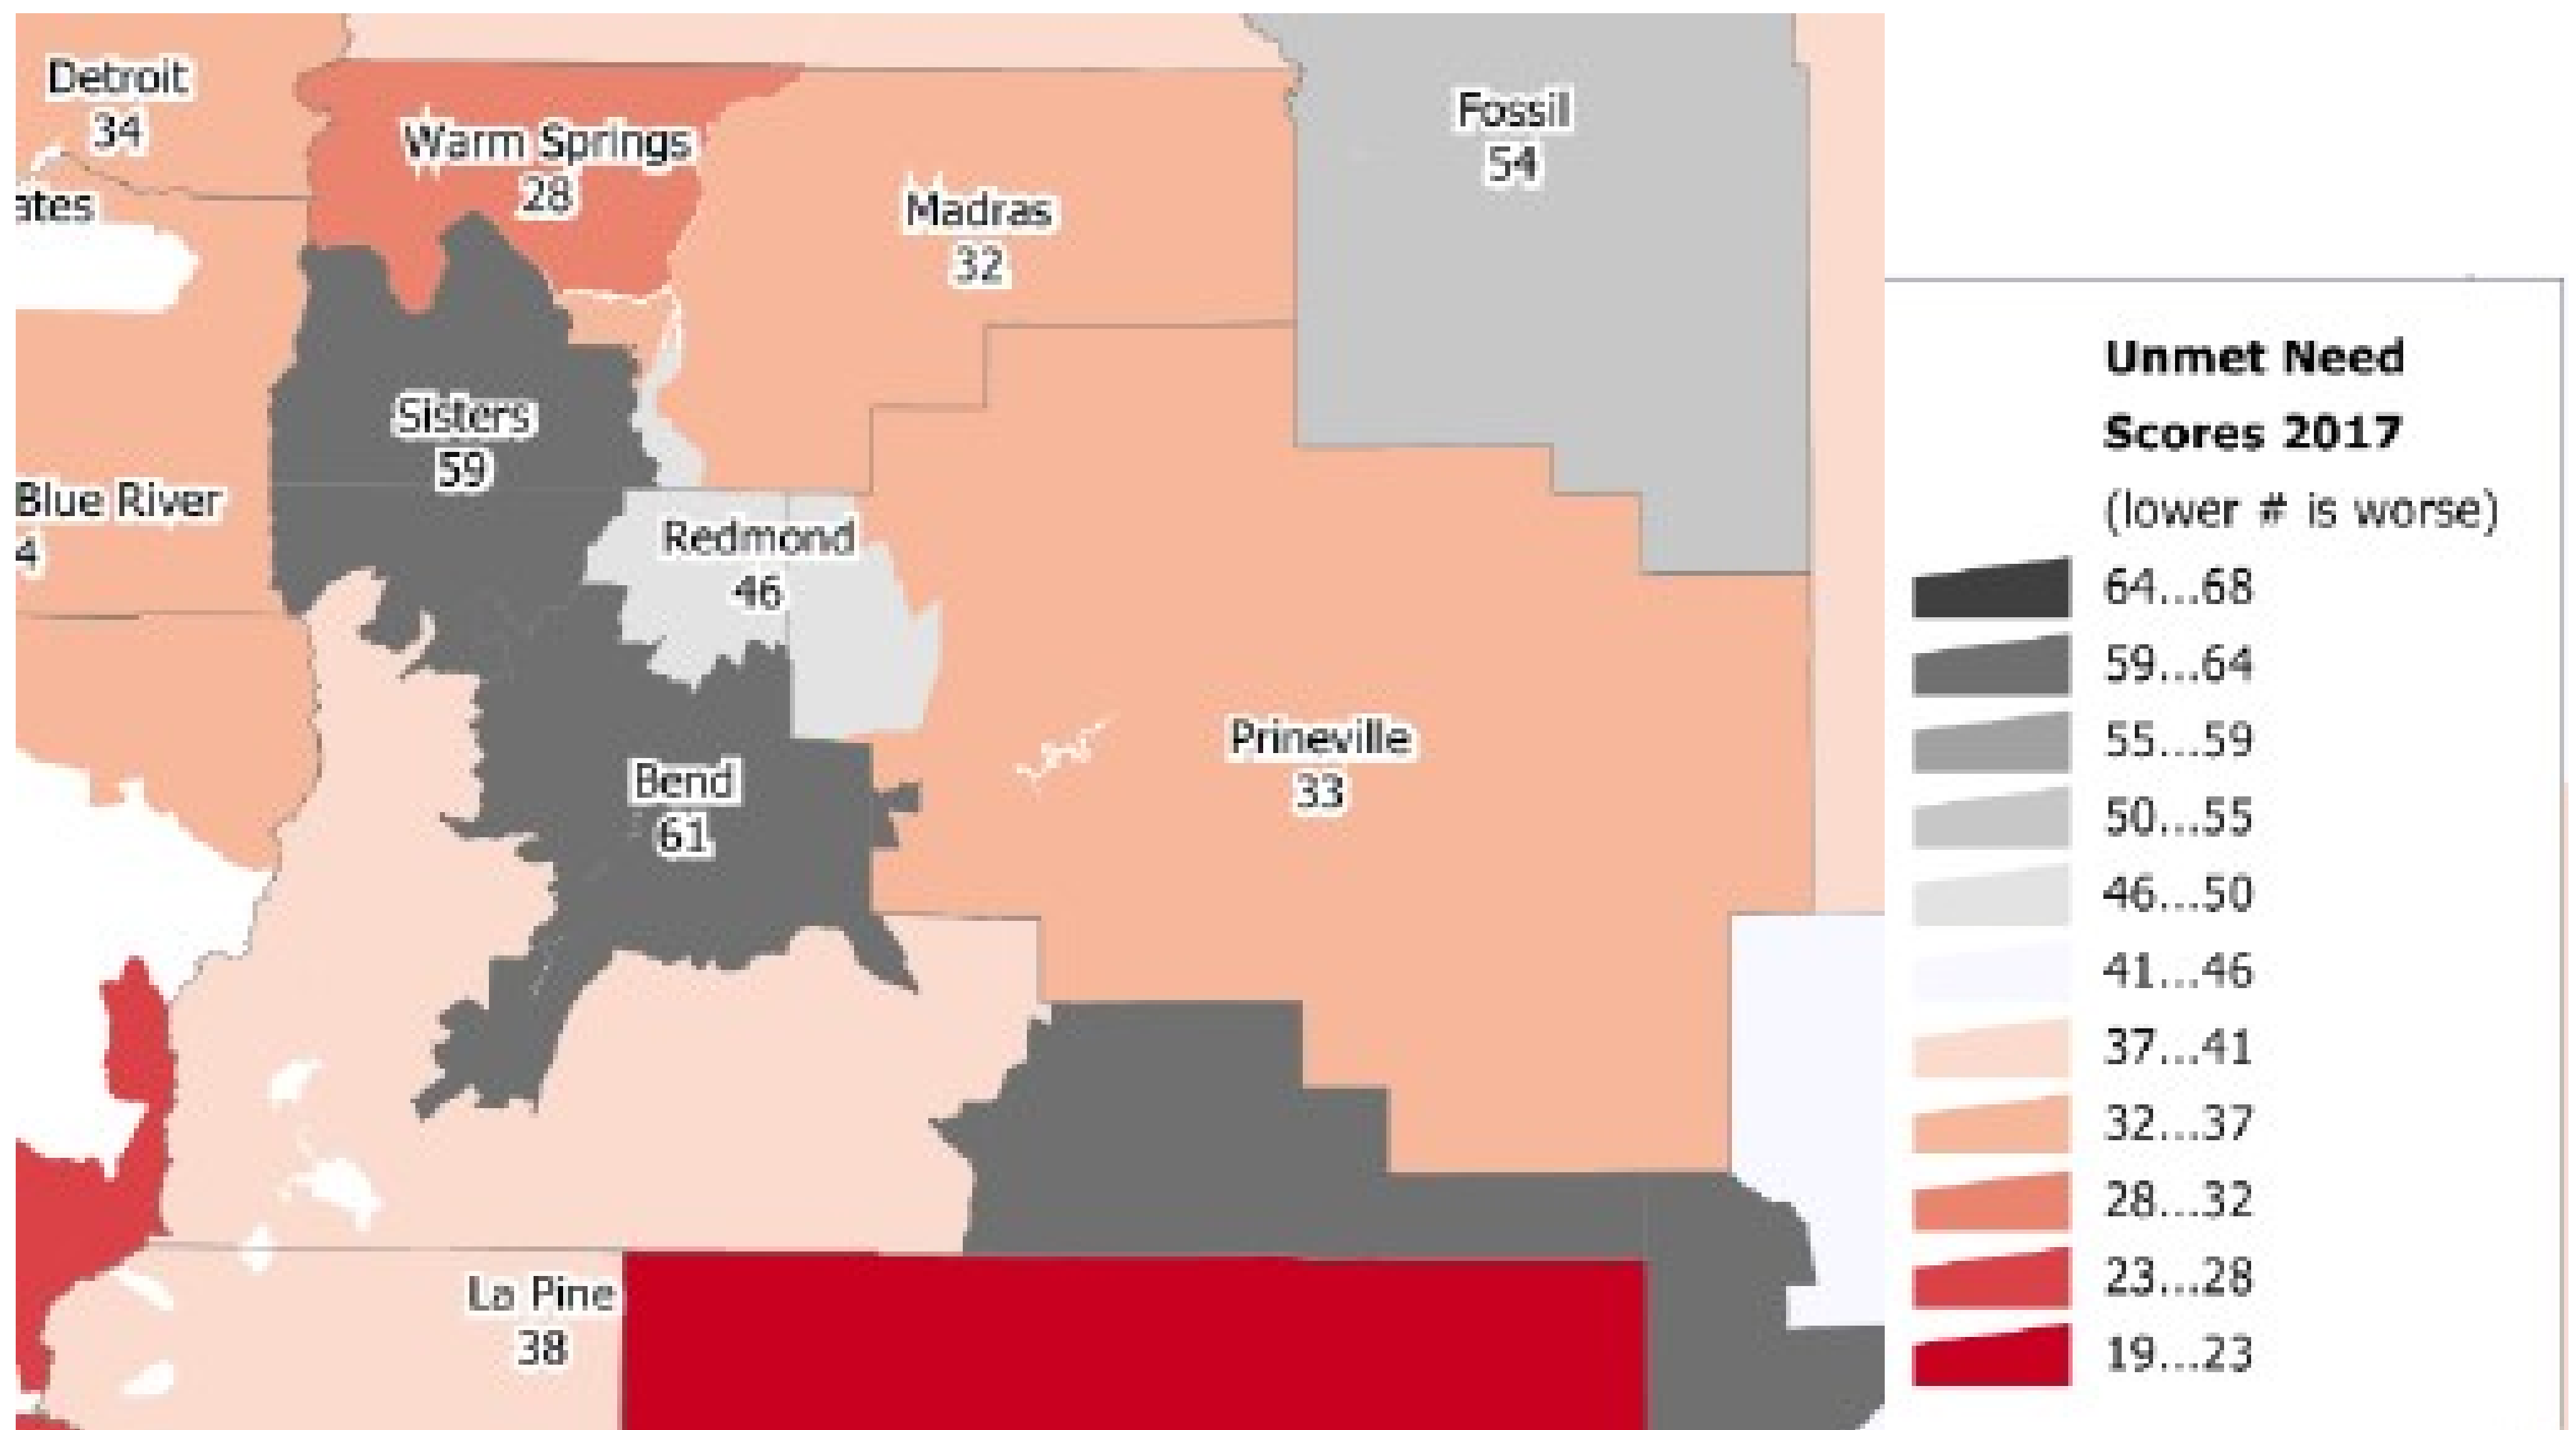

Image and Data Source: 2017 Areas of Unmet Health Care Need in Oregon Report, Oregon Office of Rural Health

The Warm Springs area is among the top ten areas of highest unmet health care need in the state of Oregon.

Warm Springs is also ranked in the top five areas of the state with the highest inadequate prenatal care.

Sisters, Madras, La Pine, Redmond, and Prineville are all considered areas that are below Oregon's average primary care capacity level.

Sisters, Madras, Warm Springs, La Pine, and Prineville are all considered areas that are below Oregon's average mental health provider capacity level.

Madras, Prineville, and La Pine are the three areas of Central Oregon with the lowest capacity to meet dental care needs.
