

COVID-19 BEST PRACTICES #2

We understand that every business is different and a patron per-square-footage requirement may not be the most helpful metric depending on the layout and type of merchandise you provide. Instead, work to determine a reasonable number of people who can be in your store at one time to ensure you can **easily maintain at least 6 feet between different groups of patrons.**

In addition to maximum number of people, think about if you can change the flow of your establishment to facilitate movement of patrons. **Where are your high traffic areas or bottlenecks and how can you alleviate them?** Use markers on the floor, signage or regular audible reminders to help patrons comply.

REMEMBER THAT BOTH DISTANCE AND DURATION OF EXPOSURE ARE FACTORS IN RATES OF TRANSMISSION. SET A MAXIMUM CAPACITY AND PREPARE EMPLOYEES TO BOTH TRACK AND ENFORCE IT.
