*As of MMWR week 41; MMWR=Morbidity & Mortality Weekly Report (CDC)

Weekly number of reported flu tests and proportion of positive tests

Calendar Week (2023-2024)

Data Source for Central OR lab reporting (graphic above & directly below): National Respiratory & Enteric Virus Surveillance System (NREVSS), a laboratory-based system that monitors temporal & geographic circulation patterns (occurring in a certain time/place) for an array of respiratory viruses. Participating laboratories (including a few in Central OR) report the total # of weekly aggregated tests; aggregated positive tests; along with specimen type/location & week of collection.

Definitions: MMWR=Morbidity & Mortality Weekly Report; MMWR weeks represent the week of the epidemiologic year for which the *National Notifiable Diseases Surveillance System* disease report is assigned by the reporting local or state health department for purposes of MMWR disease incidence reporting/publishing. From the above, week 38 corresponds to September 17-23, 2023.

Percent of reported flu tests positive by week, 2021-2024

Note: For the 2023-24 season, calendar week 39=9/24-9/30/23; MMWR=Morbidity & Mortality Weekly Report (CDC)
