

## **General-Purpose Health**Flexible Spending Account (HRE)

## Eligible Expenses

A General Purpose Health Flexible Spending Account is the most common FSA component. PacificSource Administrators also refers to it as a Health Related Expense Account (HRE). This plan allows you to set aside pre-tax dollars to use toward reimbursable healthcare expenses. Your annual Health FSA contribution will be available on the first day of your Plan Year and your Health FSA contributions will be deducted from your pay check in equal amounts throughout the year to fund the account.

- The General Purpose Health FSA allows you to pay for eligible out-of-pocket medical, dental, vision and preventive care expenses.
- You must be eligible for your employer's group sponsored medical plan to enroll in this plan, although do not need to be enrolled.
- The purchase of excessive quantities of a generally eligible expense for future use may not be reimbursable.

All expenses must be incurred for "healthcare", and not cosmetic or for general health purposes. To be considered an eligible expense, any items listed as "Potentially eligible" will require a Letter of Medical Necessity or prescription from your healthcare provider. The letter or prescription must include the item prescribed, condition being treated, and duration of treatment. For your convenience, a Letter of Medical Necessity form is available at PacificSource.com/psa under Forms.

**Please note:** Healthcare reform places restrictions on over-the-counter (OTC) medicines. Effective January 1, 2011, most OTC medicines and drugs (excluding insulin) will require a Letter of Medical Necessity or prescription from your healthcare provider. Please note this ruling does not affect all OTC items, only those considered medicines or biologicals.

The following expenses are commonly requested for reimbursement from the General Purpose Health FSA. This list is not comprehensive and is subject to change. In order for any expense to be eligible supporting documentation is required. Documentation must include:

- the date the service was incurred (not necessarily equal to the date of payment)
- a brief description of the service or product,
- the amount paid for the service,
- the patient responsibility (the amount you owed the provider or merchant) for the service or product after the insurance has paid (if insurance was billed).

On the next page is a list of eligible, ineligible and potentially eligible expenses with a General Purpose Health FSA.
