## **SECTION 1: STATEMENT OF PROJECT**

### **Introduction**

NW Lower Bridge Way is an east-west road connecting the area west of Terrebonne to US97. Between US97 and NW 43<sup>rd</sup> Street, NW Lower Bridge Way is classified as an arterial road with an average daily traffic volume of 7,724 vehicles per day (2022); west of NW 43<sup>rd</sup> Street, NW Lower Bridge Way is classified as a collector road with an average daily traffic volume of 1,135 vehicles per day(2022). The road provides as a major segment of the Sisters to Smith Rock Scenic Bikeway. NW 43<sup>rd</sup> Street is a north-south collector road connecting Crooked River Ranch (via NW Chinook Drive) to NW Lower Bridge Way with an average daily traffic of 6,782 vehicles per day (2022).

The intersection of NW Lower Bridge Way and NW 43<sup>rd</sup> Street is presently a three-legged intersection with stop sign control on the NW 43<sup>rd</sup> Street leg. NW 43<sup>rd</sup> Street intersects NW Lower Bridge Way approximately at a right angle, and a horizontal curve is present on the east leg of NW Lower Bridge Way. The Project Location is shown on Figure 1, which is attached hereto.

As the directional traffic count data shown in the attached Figure 2 suggests, traffic at the intersection primarily flows between NW Lower Bridge Way and NW 43<sup>rd</sup> Street. This corridor provides the primary access to Crooked River Ranch, a community located in both Deschutes and Jefferson Counties with a population of approximately 5,000. With its current alignment, the NW Lower Bridge Way / NW 43<sup>rd</sup> Street intersection is inadequately configured to accommodate the traffic volumes and movements that are occurring.

The NW Lower Bridge Way / NW 43<sup>rd</sup> Street Intersection Improvement project is intended to be the first phase of the NW Lower Bridge Way: 43<sup>rd</sup> Street to Holmes Road Improvement project, which is identified in the County's 2010-2030 Transportation System Plan. The NW Lower Bridge Way: 43<sup>rd</sup> Street to Holmes Road Improvement project will improve safety and mobility on NW Lower Bridge Way through intersection improvements, paved shoulder bikeway widening, traffic control device improvements, and other modernization work. Deschutes County Road Department has obligated \$2,700,000.00 in County funds for the intersection improvement project in the Department's 2023-2027 Capital Improvement Plan with the goal of completing construction of the intersection project by December 31, 2025.

Deschutes County Road Department ("the Department") seeks the services of a qualified engineering consultant team ("the Consultant") to provide preliminary engineering services, including design and surveying. Specifically, the Consultant will provide the following listed services:

### **Phase I**

1. Develop alternative improvement concepts for the intersection.
2. Prepare an analysis report that will include:
  - a. Current and 20-year horizon period safety and capacity performance for alternative concepts.
  - b. Crash data analysis to identify safety deficiencies at the intersection.
  - c. Considerations for planned growth and planned future improvements within the project area.
  - d. Findings and recommendations for a preferred concept.
3. Provide planning level cost estimates for each improvement concept.
4. Provide various graphics for use on the County website and in County staff presentations to the Board of County Commissioners and other public forums. (Public process will be addressed by County)

## **Phase II**

Upon selection by the Department of a preferred concept, Phase II work will consist of the Consultant delivering construction plans and specifications and will require a negotiated contract amendment or separate negotiated contract with the Consultant for the following services:

1. **Surveying Services** - The Consultant shall provide all labor, equipment and materials to prepare mapping and complete the design of all elements of the project. The Consultant shall:
  - a. Perform research of existing records
  - b. Establish a horizontal control network
  - c. Establish a vertical control network
  - d. Conduct a topographic survey
    - i. In coordination with the County Surveyor:
    - ii. Recover and tie monuments of record
    - iii. Resolve road centerline alignments
    - iv. Prepare a Recovery and Retracement Survey Filing Map
  - e. Prepare the right-of-way base map
  - f. Prepare legal descriptions and maps for right of way acquisitions and legalizations required for the project.
  - g. Monument the new project right of way and file a survey of record for the project upon construction completion.
2. **Design Engineering Services** - The Consultant shall provide all labor, equipment and materials for the development of engineered Public Improvement Plans. The Consultant shall:
  - a. Utilizing AASHTO, ODOT, MUTCD, and other industry standards and best practices, produce road improvement plans for the selected improvements, including 30%, 90% and 100% plan sets for preferred alternative, including refined construction cost estimates with each submittal.
  - b. Design storm water runoff control and treatment per the Central Oregon Storm Water Manual.
  - c. Develop traffic control plans for the construction phase of the project.
  - d. Prepare Project special provisions in reference to the latest edition of the Oregon Standard Specifications for Construction. The County shall provide template documents in Microsoft Word format to assist the preparation of the Special Provisions.
  - e. Provide an engineer's construction cost estimate and complete bid schedule for the project.
  - f. Provide appropriate construction period services necessary to answer all project related questions as well as review the contractor's product submittals.
  - g. Determine if there will be any utility design and relocation required as part of the project, including, but not limited to, power line relocation, canal piping, and any other utilities that fall within the project limits. Coordinate relocated and new utility alignments within the Special Provisions as necessary.
  - h. Note:
    - i. Road and other project components shall be designed to current AASHTO and Deschutes County standards and specifications.
    - ii. Contract Documents shall incorporate the current Oregon Standard Specifications for Construction and applicable Deschutes County and ODOT standards.
3. **Right of Way Services** – The Department anticipates that project right of way will be acquired through a right of way grant from the Bureau of Land Management – Prineville District (BLM). The Department anticipates that the BLM will conduct all required NEPA documentation for the project. The Consultant shall assist the Department with:
  - a. Coordination with BLM staff, including a pre-application meeting.
  - b. Completion of an SF-299 application form, including preparation of any required maps or figures.

4. Construction Engineering Services - The Consultant shall provide all labor, equipment and materials to provide appropriate construction period services necessary to answer all project related questions as well as review the contractor's product submittals.
  - a. The Department may determine to have the Consultant provide additional construction engineering services, including project management and construction inspection, upon execution of an amendment to the original contract for the survey and design services described above. The Department will make this determination based on Department staff capacity prior to the Consultant's submittal of 90% plans.

#### General Specifications and Expectations

1. Pre-Design: Attend pre-design meeting with the County to finalize a specific scope of work for the project to finalize contract with the County for design services.
2. Construction Plans: Prepare construction drawings for the above defined scope of work. Drawings shall be complete and correct working drawings and shall be in conformance with current Deschutes County Standards and Specifications and other industry standards.
  - a. The Consultant shall perform or facilitate design of other utilities such as irrigation, power, natural gas, phone and cable by coordinating with each respective utility company as required.
  - b. The drawings will be prepared by obtaining existing system information from the County and by field surveying to show existing features. Horizontal and vertical control will be based on the Central Oregon Coordinate System. Drawings will show physical features, and will include legal boundaries, tax lots, and tax lot identification.
  - c. The intent of the drawings is to provide detailed information for construction by a contractor selected through the competitive bidding process by Deschutes County.
3. Special Provisions: Prepare technical specifications.
  - a. The County will provide the Consultant with specifications (in Microsoft Word format) from a typical project for use in this Project.
  - b. Technical specifications will include, but are not limited to, general and special requirements, material and testing requirements, special construction instructions, project closeout and cleanup, surveying (construction staking), construction and other specifications as necessary.
4. Plan Review: Submit draft and final drawings with specifications to the Deschutes County Road Department and other impacted utilities, if necessary for review. County will pay for any applicable design review fees. Consultant will contact and coordinate with each agency to expedite the review process.
5. Final Plans: Prepare final drawings and specifications by revising draft versions as necessary from review comments. It is expected that the selected Consultant would meet with County staff and other agencies on a regular basis to review progress and refine draft design concepts. Provide an illustrative single page (11 x 17) exhibit drawing of the final layout for use in public meetings and presentations.
6. Contract Documents: Provide Contract/Bid Documents (drawings and specifications) to the Deschutes County Road Department for use during bidding. The final documents will include bid quantities in the proposal based on take-offs from the design drawings. Provide an electronic printer-ready (pdf) set of final plans in 11 x 17 sheet size.
7. Control: Provide survey control data consisting of traverse control points with known X, Y, and Z coordinates. The points shall be 5/8-inch rebar with horizontal and vertical information and shown on the construction drawings. This information is to be used for construction and shall be located sufficiently out of the proposed construction zone, yet readily available to the Contractor and the Surveyor providing construction staking.

8. 3D Elevation Model: Provide digital 3-dimensional elevation models of existing ground and proposed improvements in LandXML or similar format.
9. Project Budget: The project currently has a budget of \$2,700,000.00 for preliminary engineering, right of way, and construction.
10. Design Timeline: The Road Department will require 15 business days to review draft design submittals. It is anticipated that the consultant will meet with the County to provide progress reports and address design issues on a periodic basis (monthly) throughout the design process. The consultant should plan for a meeting with County representatives up to eight times during the development and approval process of the plans, including but not limited to:
  - a. Initial project meeting with appropriate attendees;
