8	Project Management	330 days	Mon 12/6/21	Fri 3/31/23		

Non-Specific Conceptual Design Site Selection Criteria Development

**Data Collection Potential Site Identification** 

Apply fatal flaw criteria via GIS data to identify potential areas where SWMF facility can be developed

**Broad Area Screening** 

Identify potential sites and evaluate against the site selection criteria, based on available GIS and online information. Select 15 top-scoring sites to proceed to Focused Area Screening.

Phase 1 (current scope of work)

Focused Area Screening

Visit 15 sites selected and gather additional information with non-invasive studies. Evaluate against the site selection criteria, based on field studies, to select 3-5 top-scoring sites for Comparitive Site Alternative Evaluation.

Phase 2 (future scope of work)

Comparative Site Alternative Evaluation/Environmental Review Process Perform geotechnical, environmental, and cultural resources studies on the 3-5 sites. Confirm and summarize land use and entitlements process required for each site. Prepare permit approval strategy under environmental, land use, and solid waste regulations. Prepare conceptual site plans and preliminary cost estimates for comparison of each potential site.

Preferred Site
Alternative Selection

Provide a decision matrix with weighted criteria and recommended SWMF site for consideration by SWAC and Board of County Commissioners.
