December: 8, 9

*Business hazardous waste is accepted for a fee.
Call (541) 317-3163 for more information.*

**SOLID
WASTE**

SAFETY TIPS

- If possible, keep products in original containers.
- If label is missing and you know the contents, add your own.
- Do not mix different products together.
- Make sure containers are not leaking and have secure lids. If leaking, place in a second leak-proof container.
- For transport, secure containers upright and store away from the driver, passengers and pets.
- Do not dump or drain any household hazardous waste into storm drains. Storm drains send runoff water either directly to the river or underground toward our drinking water supplies, typically without treatment. *Remember, only rain in the storm drain!*
