Friends,

My wife and I fully support side yard pickup of recyclables. As long-time owners, we believe this will not be creating something new but simply have us joining the rest of the country in a tried-and-true process to reuse material we are now putting in our landfill. The Sunriver community, as an early adopter of recycling, has demonstrated our strongly held belief in protecting the environment and careful use of resources. We would now like to progress from a system that worked 40 years ago to a more efficient, modern system. Surveys have shown we are willing to pay for the service.

Thank you

Paul and Laurel Brennan
